## CONSULTING ENGINEERS

COMPLETE BUSINESS/ACCOUNTING SOLUTION

### Improve your...

- » Accounting, job costing & project management integration
- » Ability to record time and disbursements against jobs
- » Project invoicing, quoting and stock control warehousing speed and accuracy
- » Ability to track, view and account for all job related costs
- » Efficiency and flexibility in timesheet entry for staff members

"Spencer Holmes Ltd are a multi-discipline firm of 35 professionals and support staff offering engineering, survey and planning services. When upgrading our accounting software we looked at a variety of packages. ABM offered significant advantages to our practice. We agreed to work with developers to create a time cost module more suited to the needs of professionals who record time and disbursement costs at job level. We were looking for a spreadsheet style application which was easy to use, simple to maintain and allowed each staff member to enter their own timesheets daily. The application comes with a Job Management Viewer, which allows us to review the time charges, disbursement costs, accounts payable and accounts receivable etc. We are very pleased with the result that has been achieved."

Spencer Holmes Limited

# INTRODUCING A FULLY INTEGRATED BUSINESS & ACCOUNTING SOLUTION TAILOR MADE FOR CONSULTING ENGINEER BUSINESSES

Plus:  
+ Project Invoicing

- » Timesheets, job costing, time & disbursement costs
- » Track costs by employee, job, costs centres & stage

## ABM

### ADVANCED BUSINESS MANAGER

Advanced Business Manager (ABM) has been designed and developed by accountants and IT professionals to be the next generation of accounting software for progressive businesses.

Building on the past principles of accounting software and paying close attention to the demands of today's business environment, ABM is an innovative accounting and business management system suited to the consulting industry. Using the latest technology and integration facilities, ABM is a flexible and advanced management system which streamlines the running of your business with its array of insightful features.

Particularly useful are ABM's job costing and reporting features, currently being used in today's consulting industry.

Included in this package are ABM's optional modules: Job & Timesheeting and Project Invoicing, providing an integrated workflow for efficient cost tracking and billing with sophisticated business analysis.

## JOB AND TIMESHEETING

### TIME MANAGEMENT SYSTEM

ABM's Job and Timesheeting functionality has been designed to provide a mechanism for medium to large numbers of staff entering timesheet information. This information can be lodged against jobs and projects using a flexible and efficient entry method. This module has the ability to set up and charge disbursements to jobs and comes with an enhanced job management viewer for monitoring purposes. ABM's Job and Timesheeting module reduces the unnecessary effort and hassle of daily time management, while creating streamlined processes for billing and job management.

## PROJECT INVOICING

ABM's Project Invoicing module allows you to invoice charges to a job according to variable criteria, enabling fast, flexible and simple invoice or draft invoice creation for customer projects and jobs. This module also gives the user the option to choose the amount to invoice and the value of work in progress to be written off.
